

**A NEW NAME.  
THE SAME  
DETERMINED  
TEAM.**

**Precision.  
Innovation.  
Pivotal.**

Luke Boesel

Josh Miller

**For over 15 years**, we've been in the business of solving complex engineering challenges with practical, innovative solutions that help our clients improve production and accelerate growth. Under Lucas J. Boesel's leadership, LJB Product Solutions (LJB) has become a Southeastern Wisconsin go-to resource for custom machines and automation equipment, as well as fast-turnaround product solutions at every point in the design-to-fulfillment cycle.

After producing countless solutions for our customers, we created one for ourselves. **LJB Product Solutions is now Pivotal Engineered Solutions.**

This new name reflects who we are today and how we've grown. While LJB Product Solutions began as a nod to our founder, we're more than just LJB. We're a team of hands-on problem solvers made up of engineers, product designers, and fabricators. Pivotal Engineered Solutions better captures our team of doers and our role in customers' success. With precision:

*Engineering real-world solutions  
with precision in every detail.*

- **We are pivotal to progress.** Providing turnkey engineering solutions to help them overcome challenges and move their business forward.
- **We pivot at the speed of change.** Nimble and agile is the way we're built.
- **We're at the pivot point of innovation.** Bringing projects to life from concept to completion in the areas of turnkey custom machines and automation solutions, low-volume manufacturing, prototyping, and product development.

**WHEN YOUR PROJECT REQUIRES INNOVATION, RESPONSIVENESS, AND ENGINEERING EXCELLENCE, MAKE IT PIVOTAL.**
